Letter of Recommendation

05 March, 2026

The Selection Committee & University Admissions Office

To Whom It May Concern,

I am pleased to recommend my student, Md. Shahariar Nafiz Irfan, for your scholarship program and for admission to your university. As his Professor of Mathematics at Shaheed Ramiz Uddin Cantonment College, I have witnessed his academic growth and technical development firsthand. Irfan recently finished his Higher Secondary Certificate (HSC) in the Science stream, earning a strong GPA of 4.17/5.00. His success reflects his consistent discipline and sharp analytical skills.

Irfan shows exceptional technical insight. In addition to his coursework in Advanced Mathematics and ICT, he has taken the initiative to seek specialized training that puts him ahead of his peers. His qualifications include certifications in Data Science and Artificial Intelligence from Cambridge International Qualifications, as well as Machine Learning credentials from Amazon Web Services (AWS). What is truly remarkable is his practical experience; he is currently a Quantitative Trader for Alpha Capital Group (UK), where he manages $200,000 in proprietary capital from a distance. This responsibility highlights his maturity and risk management skills.

What sets Irfan apart is his strong commitment to his home country, He has a deep ambition to return to Bangladesh after his studies abroad to start the nation's first Humanoid-AI Hedge Fund. By applying Reinforcement Learning and High-Frequency Trading (HFT) algorithms—projects he is actively developing—he hopes to modernize our financial system and support the national economy through data-driven innovation.

Beyond his technical skills, Irfan has a strong character. His dedication to social responsibility is clear in his volunteer work with the As-Sunnah Foundation and Volunteer for Bangladesh, where he has led logistics and sustainability efforts. Additionally, his proactive approach to global integration is evident from his recent completion of a Romanian A2 language course, showing his readiness for an international academic setting.

I am confident that Irfan will be a valuable asset to your institution. He has the intellectual curiosity, technical skills, and moral drive needed to excel in high-level research and global finance. I wholeheartedly recommend him to you.

Sincerely,

Shree Krishna Ghosh,
Senior Professor of Mathematics,
Shaheed Ramiz Uddin Cantonment College
